

Inspired by sound

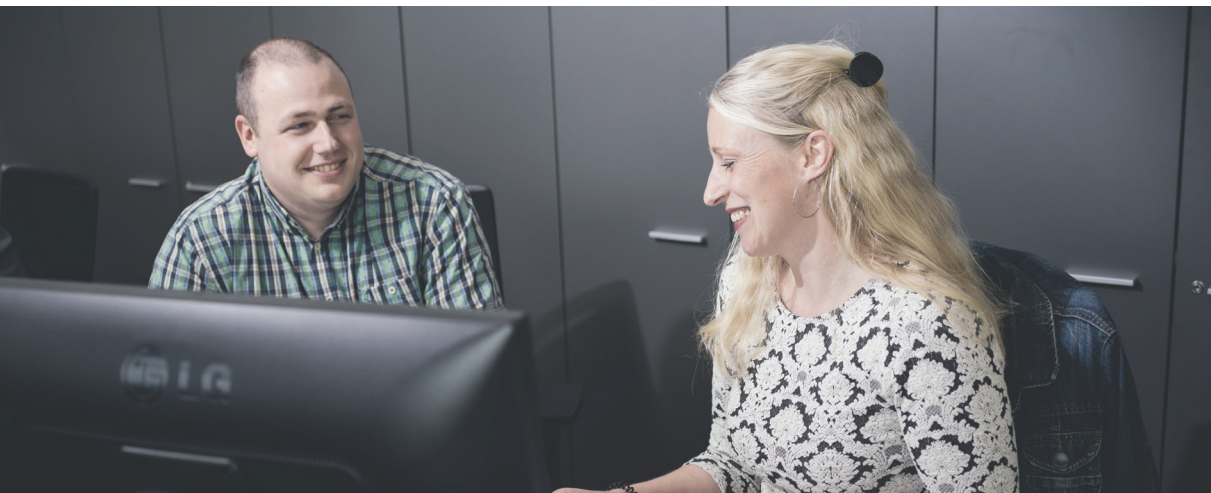

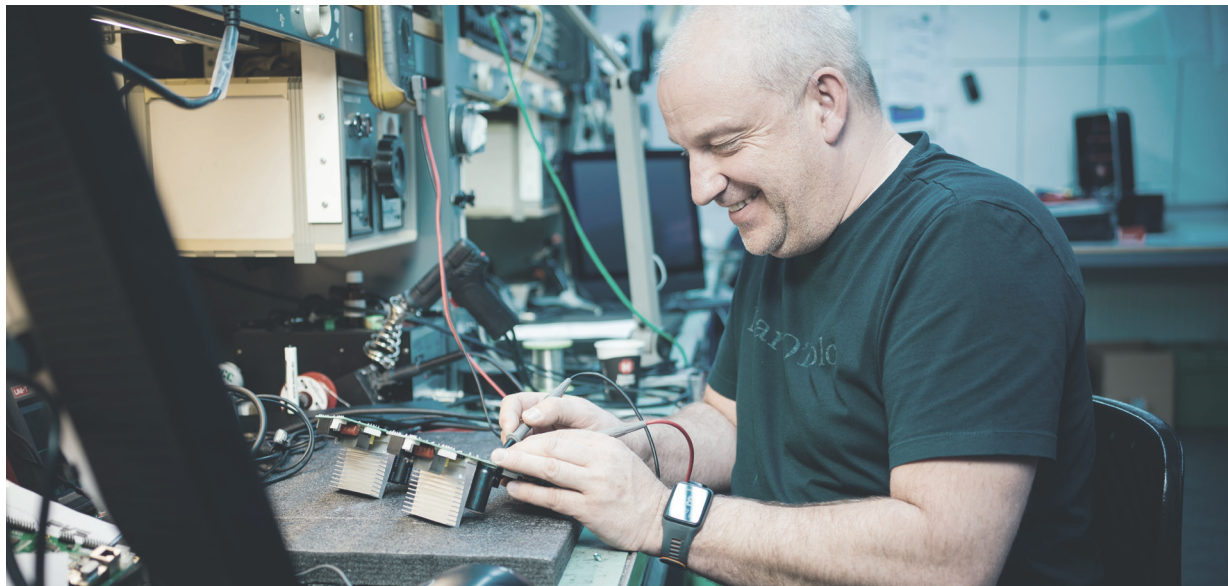

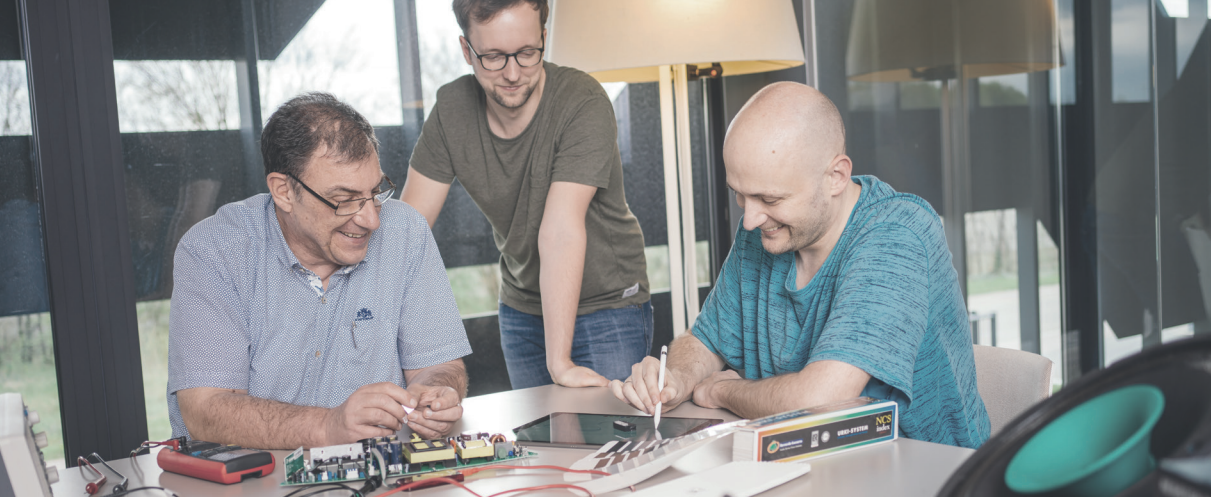

## The journey continues

The journey of AUDAC all began when a young Patrick Van de Sande who at the age of 6 was triggered by a technician that came in and repaired his parent's television. Watching the technician bring back the broken television to life left a huge impression on Patrick and soon he was tinkering and playing with all electrical devices he could get his hand on.

What started as a hobby for Patrick grew into an international brand that pays great attention to innovation and durability. After all these years we still believe in the same foundations that have formed us.

## *Inspired by sound*

It is what we experience through the senses that makes life meaningful. In fact, it can be said that through the qualities in speech and music we experience, we become familiar with the higher values of life.

This is just one of the reasons why at AUDAC you will find a passion for sound. Each speaker, audio matrix or amplifier solution we develop expresses that same inspiration and quality that exceeds users' expectations, making it no coincidence our success results from exploring new methods and ideas beyond conventional boundaries.

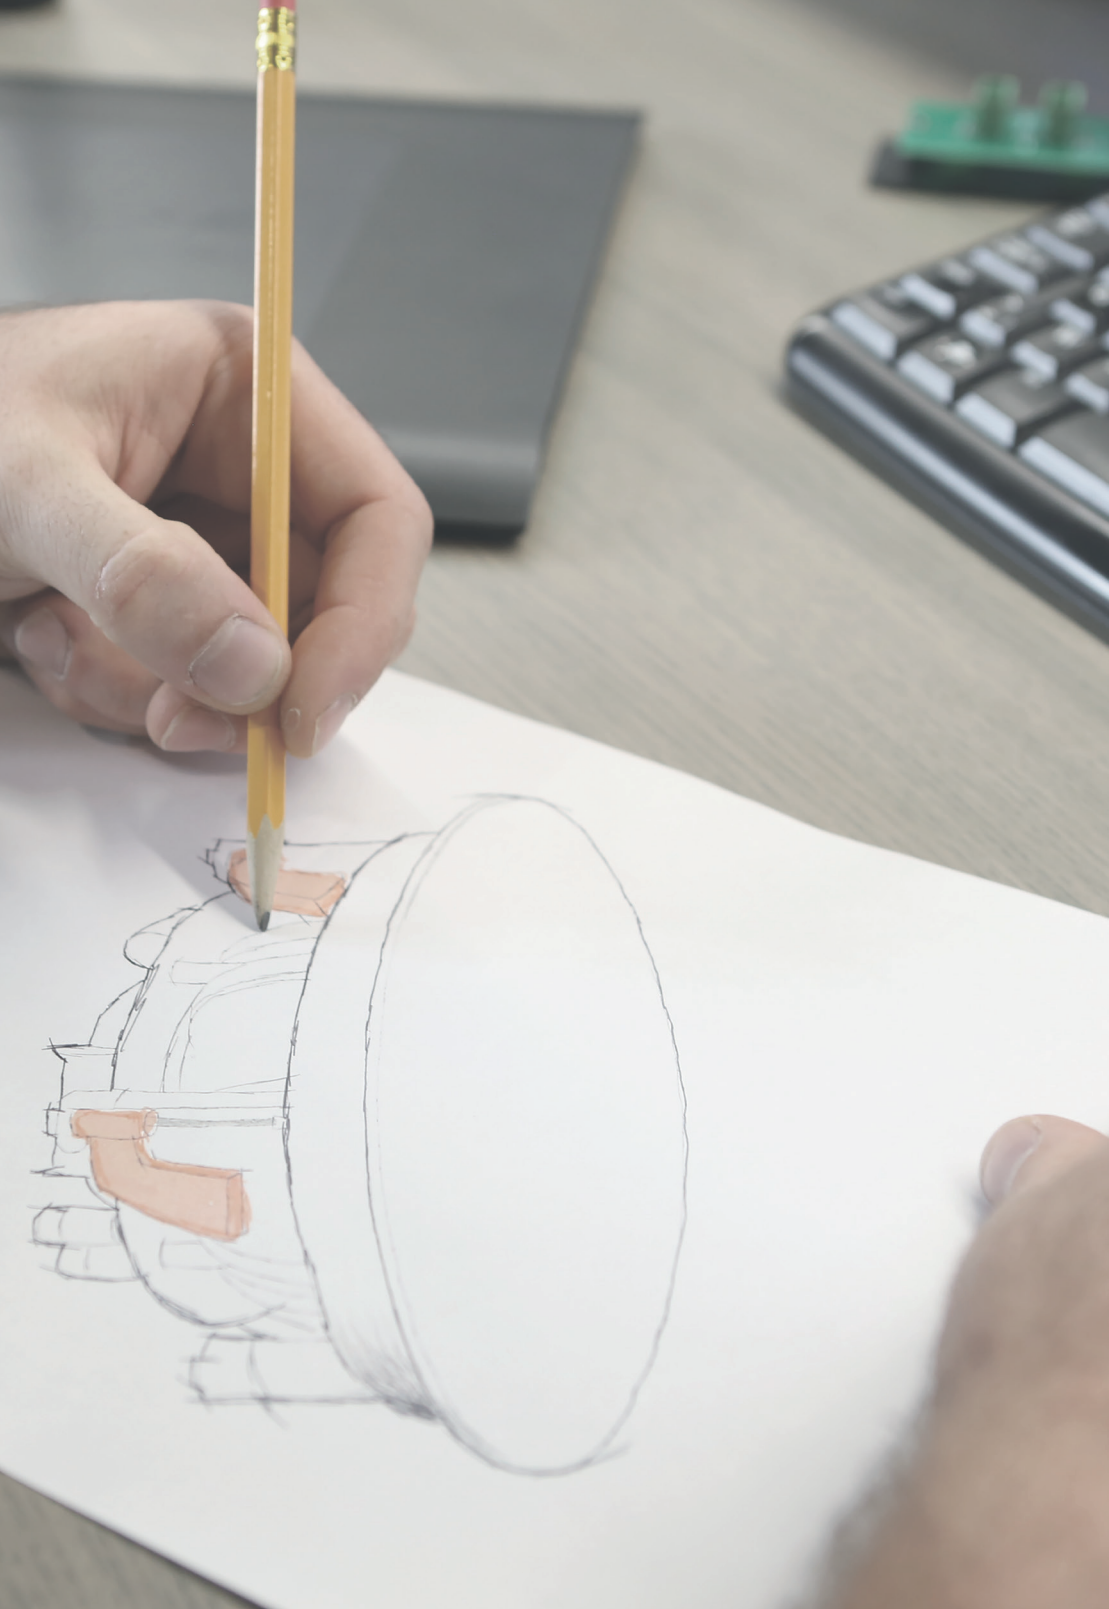

*"We all share one common dream:  
changing audio for the better."*

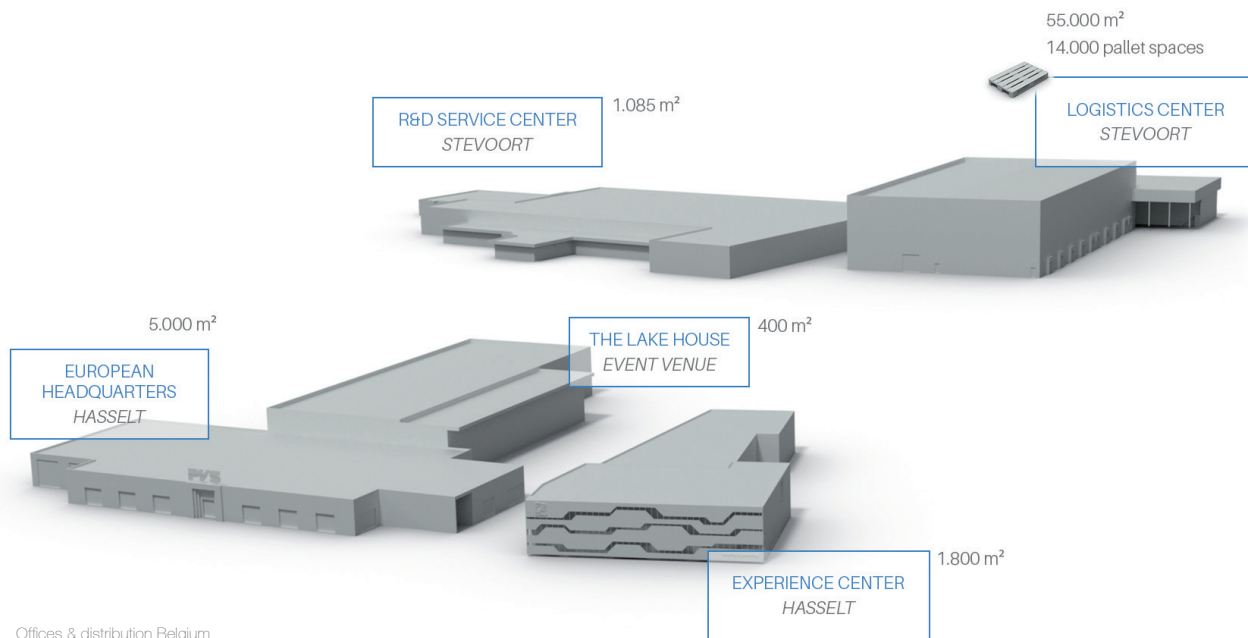

*Always  
Ahead of time*

It's not just about the innovation of better products, it's about creating an experience. That's why we gather exceptional talent with various beliefs, perspectives and backgrounds, but we all share one common dream: changing audio for the better. Just one example of this dedication must be the development of the world's first web-based matrix, which rocked the audio world, forever strengthening our vision of launching inspiring products and ensuring quality comes first.

A photograph of a modern building with a dark, metallic facade. The facade features a series of large, irregular, angular cutouts that reveal the interior structure and some people inside. The building is set against a clear blue sky.

## *Experience* *the difference*

Providing the best value and service together with the ability to listen to the needs of their partners has led to the fact that many distributors around the world selected AUDAC as their main audio brand.

To further enhance these relationships in 2013 the brand built the **AUDAC Experience Center** in. The main purpose of this new state-of-the-art building is to let distributors and end-users experience the products in a unique environment. Besides several listening and demonstration areas, it also includes training areas inside the complex to educate our partners on a regular basis.

# AUDAC Touch™ 2

Amplify sound, simplify control

AUDAC Touch™ 2 completely changes the way an environment can be operated. By offering a freely available out of your pocket total system solution not only the sound system can be operated very easily, but third party equipment such as projector screens/lights can be controlled effortlessly as well. Audiovisual users choose AUDAC Touch™ 2 because they can fully personalize their own dashboard and add and control audio sources or streaming services such as Spotify.

With the needs of our users always in our minds, we have ensured that AUDAC Touch™ 2 goes far beyond the functionalities of the automatically recognized products.

Visit [audac.eu/touch](http://audac.eu/touch) for more information.

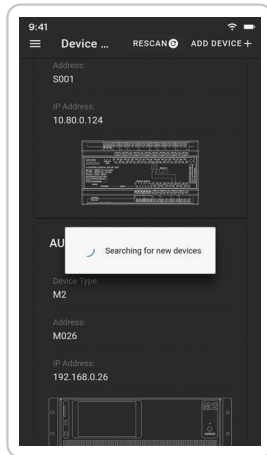

Drag and drop any widget from any device onto your dashboard.  
It's that simple!

*"AUDAC Touch™ is the connection between audio- lighting- video- and automation systems. The ease-of-use in control of audio sources and volume control makes the application suitable for every project."*

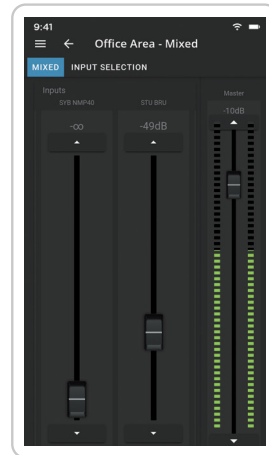

Dominic van der Heiden, AudioBizz Benelux

## What's new?

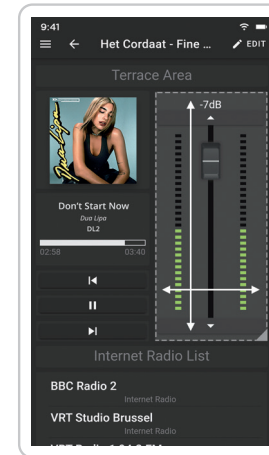

### Automatic device discovery

Adding your AUDAC devices has never been this easy! The automatic device discovery will automatically recognize all devices in your system, guaranteeing an easy and rapid setup of your own custom dashboard.

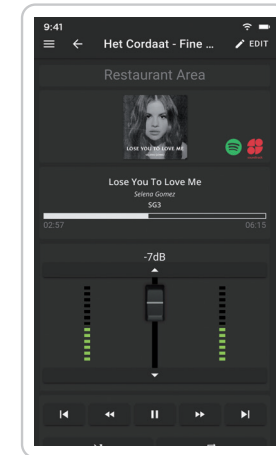

### Mixing functionality for M2

AUDAC Touch™ 2 allows you now to use all possible control functions, including the most advanced mixing capabilities of the M2 multimedia digital audio mixer from any smart device.

### Free scalable and placeable widgets

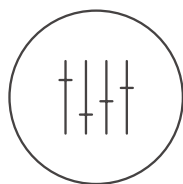

Create your own dashboard, AUDAC Touch™ 2 is 100% customizable which guarantees fully flexible positioning and scaling of a very wide range of different widgets.

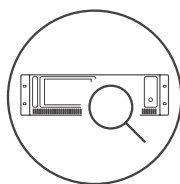

### Professional licensed audio streaming

The NMP40 Audio Streaming SourceCon™ module is designed to bring the world's first total streaming solution for both residential and commercial applications\*, thanks to the collaboration with Spotify™ and Soundtrack Your Brand©.

## *Our core values*

Driven by  
innovation

The essence  
of design

Listening to  
our partners

Thinking in  
solutions

Providing controllability  
and simplicity

A true sound  
experience

## Installed sound solutions

It's our passion to listen to our users and exceed their expectations by providing functionalities and quality beyond compare. With our wide range of audio solutions, a custom-made sound system can be guaranteed in any kind of reference. On the next pages you will get a glimpse of the main building blocks that form our innovative sound solutions.

Het Cordaat | Hasselt, Belgium runs on AUDAC

## Inspiring loudspeakers

The sound coverage plays an important role in creating a suitable ambience within the given environment. Owners of an audio system we have spoken to, attach great importance to a user-friendly solution that creates an impeccable sound division. AUDAC's wide range of loudspeakers has been specifically engineered by fine-tuning every component to deliver astonishing sound clarity.

One of many loudspeakers which is designed with this vision in mind is the ATEO wall loudspeaker series. The ATEO combines a true to nature high-fidelity reproduction of music and speech with a stunningly elegant looking ABS housing, making them perfectly suitable for the most demanding projects.

In addition to our wall speakers, AUDAC also offers a wide range of outdoor loudspeakers, horn speakers, column speakers and bass cabinets designed with the same passion.

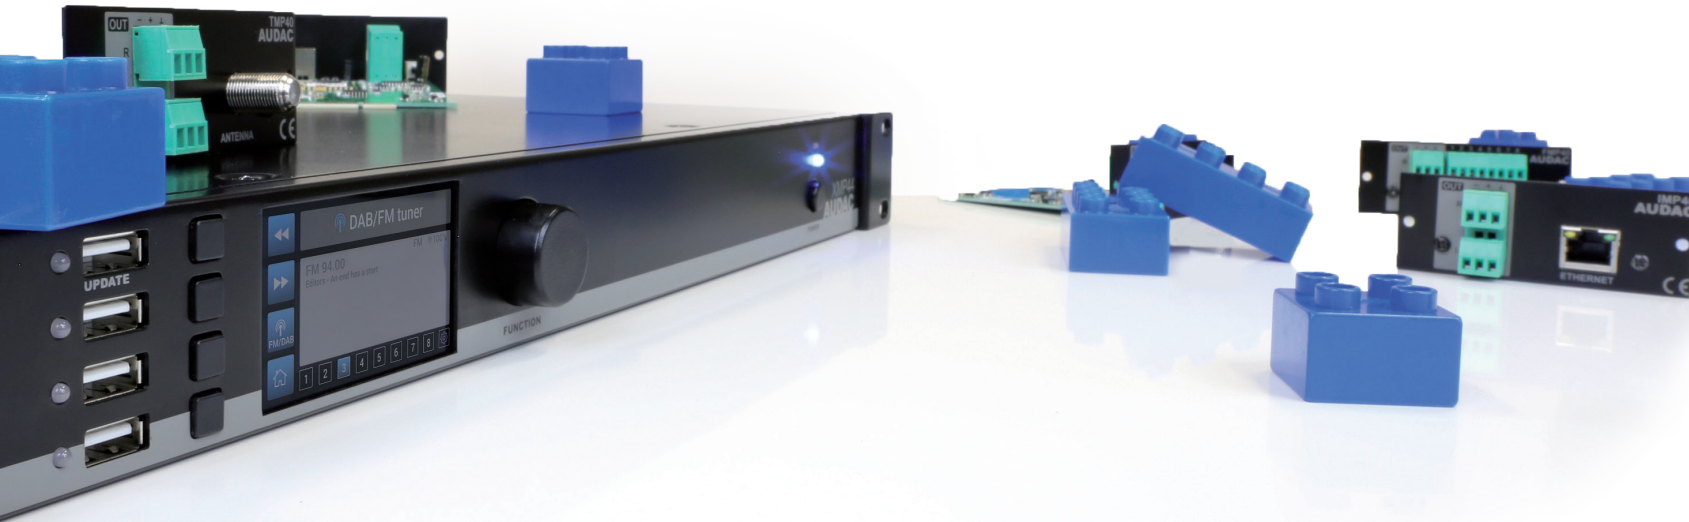

Lava Centre | Hvolsvöllur, Iceland runs on AUDAC

## Professional modular audio players

We truly believe in providing a user-friendly solution that goes beyond comparison. With this focus we have developed a single modular audio player that **is fully configurable** to the needs of any application thanks to the 4 slots at your disposal. Each slot allows implementation of any available module selectable between: media player, voice file module, network player, DAB/DAB+ and internet radio.

AUDAC works in close collaboration with:

Porsche Centre Antwerp | Wommelgem, Belgium runs on AUDAC

## Multi-zone matrix systems

The AUDAC multi zone audio distribution systems offer a versatile audio solution for commercial and residential applications. The AUDAC MTX series, M2 and R2 deliver **a comprehensive and expandable powerful solution for nearly every situation**. With their large number of extension modules and configuration modes, they provide a solution for an endless amount of installations- large or small, simple or complex.

All matrixes can be controlled by means of additional control panels, its fully functional web based interface or the AUDAC Touch™ app. The RS232 port makes the matrix compatible with any home & industrial automation systems.

*Rock solid  
performance*

## Multi-channel amplifiers

The professional range of AUDAC amplifiers is designed to bring flexibility, scalability and simplicity to the most complex audio systems. AUDAC completes this full portfolio with Class D amplifiers which meet the highest standards such as excellent efficiency and low heat dissipation. Due to the passively cooled entity only a minimal of maintenance is needed, while simultaneously ensuring maximum reliability.

## Custom project?

Are you looking for advice on a custom audio project? Feel free to contact and challenge us to provide you with a complete AUDAC solution. With local partnerships in over 82 countries we are always able to provide you with the most suitable solutions.
